

BSCN books grants

The council of the BSCN will make available the sum of £450 each year to support UK departments of clinical neurophysiology which train junior medical and scientific staff in maintaining a selection of reference books relevant to the practice of the speciality. The following rules will apply.

- 1) Any UK department which hosts staff in training may apply.
- 2) A maximum of one application from a department will be granted in any 2 year period.
- 3) Applications must be received by the secretary or treasurer by the 31st January each year, stating the book required.
- 4) An award will be subject to a maximum of £150. If a department seeks a more expensive book they may offer to make up the difference.
- 5) Applications will be reviewed by three members of council and decisions will be ratified at the spring council meeting.
- 6) The society will procure the volumes requested and present them at the Summer scientific meeting.

Priority will be given to applications from departments with newly appointed trainees and to those who actively contribute to the scientific content of the society's meetings.
